**CMMC (Cybersecurity Maturity Model Certification)** is a unified standard for implementing cybersecurity across the defense industrial base. Adherence to CMMC will be required by all DoD contractors and sub-contractors starting 2021.

Complying with CMMC is not easy and is not free, but it does provide your company with best practices for data security and reliability, while, if done correctly, also creates organizational efficiencies that offset the compliance costs.

Lifeline Data Centers is a CMMC compliant Cloud Service Provider (CSP). By using Lifeline as your application hosting solution, your company inherits Lifeline's CMMC compliance.

### CMMC Made Easy

**Only 20% of the Controls Are Your Direct Responsibility**

**80% of the Controls Are Lifeline's or a Shared Responsibility**

- Navigate the complicated process
- Provide a budget-friendly path
- Allow you to inherit the maturation and implementation of work and money that Lifeline has invested

**CMMC is hard – Lifeline makes it easy.**
